

# FLYING BANNERS Feather & Blade

## INSTRUCTION SHEET

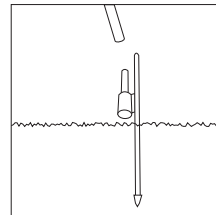

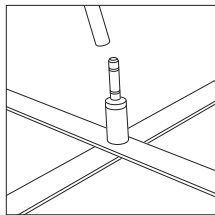

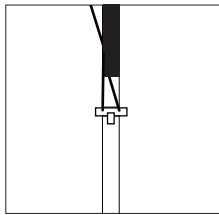

- 1 Hammer the sharpened end of the ground stake into the ground or unfold the hard surface stand.

Tip: To allow the banner to rotate in the wind leave a 2" ground clearance. (see below)

- 2 Connect the poles by inserting each small pole into the next larger size pole.

- 3 Slide the sleeve over the pole until tight. Make sure tip of pole is at the end of the sleeve.

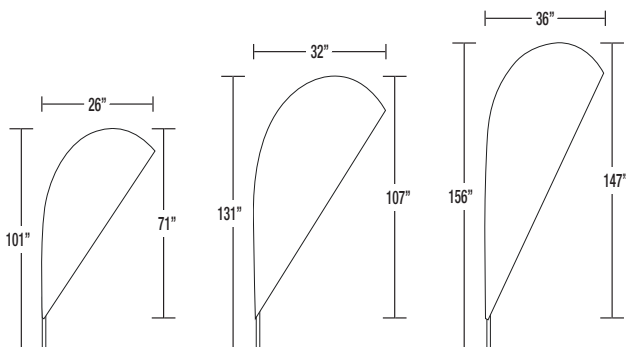

- 4 Attach the banner clip to the attachment point on the large pole.

Note: To help reduce wrinkles and create optimal banner tension, you may need to tighten or loosen the bungee.

- 5 Slide the pole over the post on the stand.

### TEARDROP

### BOW FLAG
