

Light Blanket Power Supply Replacement

1

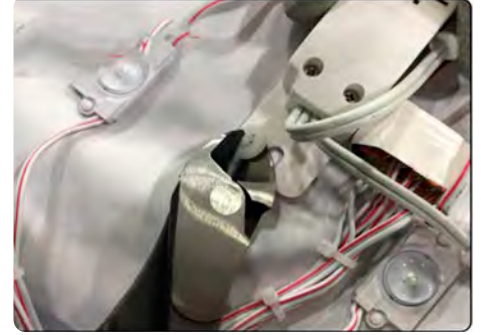

Identify the power supply that needs to be replaced. Unplug Lightblanket.

2

Unplug the power supply from the LED lights.

3

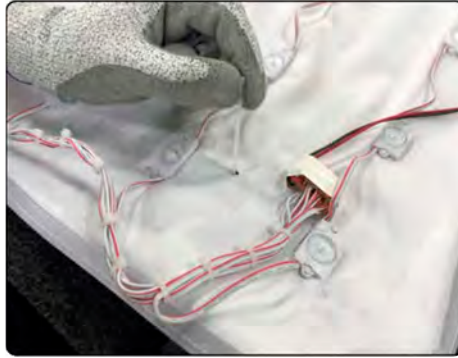

Cut plastic lock securing power supply to fabric.

4

Remove the power supply.

5

Insert a new plastic spine into the light blanket.

6

Side lock down plastic spine to secure the new power supply to the fabric.

7

Reconnect the power supply to the LED light. Press until you hear it click.

8

Plug-in light blanket and test to make sure new power supply works.
